

FRONTEND DEVELOPER - VUE.JS

Evgenii Korzhan

Product frontend, reusable UI, TypeScript and production delivery

Frontend and mobile developer since 2018. I build and improve product interfaces, reusable components, API-driven screens, typed frontend flows and production-ready UI. I can join an existing team, discuss technical decisions, review code and keep delivery practical.

Commercial frontend work

TypeScript

Typed frontend delivery

Vue + React

Product UI experience

B2 English

Technical calls and reviews

Fit for 01.tech Vue.js Role

- Commercial frontend experience from 2018: product UI, reusable components, API integration and production support.
- Vue.js and modern frontend stack context: Vue, Vue Router, Vuex/Pinia concepts, Nuxt.js context, React, TypeScript and JavaScript.
- Comfortable improving existing components, discussing architecture, estimating tasks, reviewing code and supporting team quality.
- Good fit for UI Kit work: component composition, forms, lists, responsive layouts, Tailwind-style utility thinking and design-to-code delivery.
- Can implement medium UI animations with CSS transitions, CSS animations and JavaScript-driven interaction when needed.
- Practical engineering mindset: KISS, YAGNI, maintainable modules, browser behavior, performance and production debugging.

Experience

Bacca - React Native / Frontend Developer

April 2023 - Present

- Build and improve mobile and frontend products with React Native, React, Vue, JavaScript and TypeScript.
- Deliver reusable UI, API-driven screens, state, forms, debugging, performance fixes and production support.
- Work with existing codebases, Git workflows, component structure and stable delivery without unnecessary rewrites.

Knomary - React Native Developer

February 2019 - August 2023

- Started a cross-platform business app from scratch: architecture, UI, logic, navigation and integrations.
- Worked with forms, localization, offline flows, files, branding, API integrations and platform-specific behavior.

Softteco - Software Engineer

October 2018 - February 2019

- Main developer for a UK auto dealer app: UI, API requests, camera/media features, upload flows and production fixes.

Exadel - Software Engineer

April 2018 - September 2018

- Frontend development with JavaScript, React, Redux, Angular, RxJS, SCSS, Shopify and Ant Design.

How I Work

- I prefer simple, readable solutions first and add abstractions only when they remove real complexity.
- I can estimate a task, split the scope, clarify edge cases and keep the team aligned during implementation.
- I care about stable UI states: loading, error, empty, validation, permissions, slow network and browser differences.

Core Skills

Vue.js Vue Router Vuex / Pinia Nuxt.js context TypeScript
JavaScript React React Native Component architecture
UI Kit work Tailwind-style CSS SCSS CSS transitions
CSS animations Responsive UI REST API GraphQL context
Forms Validation Code review Git KISS / YAGNI
SOLID context MVVM context Performance Cypress Jest

Relevant Projects

Bacca frontend products

Frontend and mobile product work with Vue, React, TypeScript, reusable UI and production fixes.

YPA Finance

Dashboard, AI coach, budgeting, debt payoff, alerts, auth and API-driven finance screens.

Demetra

B2B catalog, sales flows, product lists, order screens and admin/product context.

Rutilus / Norilsk Nickel

Enterprise workflows, document details, search, approvals, support and optimization.

SmartEat

Forms, food search, profile, diary, questionnaires, validation and API screens.

Education

BNTU - 2015, logistics / transport organization

The Rolling Scopes School - 2016, JavaScript / Front-end
