

REACT / REACT NATIVE DEVELOPER

Evgenii Korzhan

Frontend and mobile apps with React, TypeScript, and React Native

React and React Native developer since 2018. I build TypeScript features, reusable UI, API-driven screens, localized product flows, and production-ready apps while communicating clearly with product, design, and backend teams.

Experience

Bacca - React Native Developer

April 2023 - Present

- Build and improve mobile and frontend products with React Native, React, Vue, JavaScript, and TypeScript.
- Deliver reusable UI, API-driven screens, navigation, state, debugging, performance fixes, and production support.
- Work with existing teams, Git workflows, component structure, and stable delivery without unnecessary rewrites.

Knomary - React Native Developer

February 2019 - August 2023

- Started a cross-platform business mobile app from scratch: architecture, UI, logic, navigation, and integrations.
- Worked with forms, media, localization, offline flows, file handling, branding, API integrations, and platform-specific behavior.

Softteco - Software Engineer

October 2018 - February 2019

- Main React Native developer for a UK auto dealer app: UI, API requests, camera photo/video capture, uploads, and Theta 360 workflows.

Exadel - Software Engineer

April 2018 - September 2018

- Frontend development with JavaScript, React, Redux, Angular, RxJS, SCSS, Shopify, and Ant Design.

How I Work

- I can start a mobile app from zero or quickly join an existing team and codebase.
- I focus on clear structure, reusable UI, stable integrations, production support, and release readiness.

Fit for React / Next.js Role

- Strong React fundamentals: hooks, state, forms, composition, reusable UI, and component-based architecture.
- TypeScript, REST / GraphQL API integration, loading/error/empty states, auth flows, lists, and validation.
- Relevant UI stack context: Ant Design, Material UI, styled-components, responsive layouts, and design-to-code work.

- Can work with Next.js App Router projects, SSR / SSG / ISR concepts, i18n, Sentry, Docker basics, NX, and headless CMS flows.

Core Skills

React Native TypeScript JavaScript React Next.js

App Router SSR / SSG / ISR Redux Context

React Navigation REST API GraphQL Headless CMS

Ant Design Material UI Styled-Components i18n Sentry

Docker basics NX context Offline flows Native modules

Performance Jest Detox Cypress CI/CD Fastlane

App releases

Selected Projects

YPA Finance

Finance dashboard, AI coach, budgeting, debt payoff, alerts, and auth.

SmartEat

Food search, meal tracking, profile, diary, questionnaires, and API screens.

Demetra

Agribusiness catalog, product lists, orders, sales flows, and admin context.

Empiflow

Onboarding tracks, activities, learning content, library documents.

Rutilus / Norilsk Nickel

Enterprise document workflows, search, approvals, support, and optimization.

Auto Dealers Media App

Camera, photo/video capture, gallery, upload queue, and Theta 360 integration.

Education

BNTU - 2015, logistics / transport organization

The Rolling Scopes School - 2016, JavaScript / Front-end
